# Packaging and Packaging Waste Regulation Declaration

In February 2025, Regulation (EU) 2025/40 on packaging and packaging waste (PPWR) entered into force. We have assessed the relevance of this regulation for all packaged goods supplied by us.
For all our packaged branded products delivered to you from 12 August 2026 onwards, we, as manufacturer, will ensure compliance with the applicable requirements and obligations of the PPWR. This includes, in particular, the performance of the conformity assessment procedure in accordance with Article 38 of Regulation EU2025/40, including compliance with the substance restrictions set out in Article 5 of Regulation EU2025/40.
Furthermore, the EU Declaration of Conformity (DoC), pursuant to Article 39 of Regulation EU2025/40, will be available for all relevant packaging from 12 August 2026.
All information and documentation required to demonstrate the conformity of the packaging shall be made available, upon reasoned request, to the competent national market surveillance authorities in accordance with Article 15 (10) of Regulation EU2025/40.
Any broader blanket disclosure to trading partners is not required by law. However, should you have specific product-related questions, we will of course be happy to support you.
